Summary

Java Backend Developer with 2+ years of experience building scalable enterprise applications using **Java, Spring Boot, and React** for banking and fintech platforms serving production users across **Hong Kong and Singapore**. Experienced in developing secure **REST APIs**, implementing **OAuth2/OIDC**-based authentication, and delivering cloud-native applications through **CI/CD** pipelines on **Kubernetes** and **Azure**. Strong expertise in **Microservices, Distributed Systems, API Design**, and **Agile** software development.

Technical Skills

Languages: Java 8/11/17/21/25, SQL, Python, C, C++, JavaScript, HTML

Frameworks & Libraries: Spring Boot, Spring Cloud, Spring Security, Quarkus, JPA/Hibernate, React.js, Lit

Backend & API Development: Microservices, REST API Design, API Gateway, OAuth2, OpenID Connect, OpenFGA, Keycloak, IBM FileNet, Spring Data JPA, OpenAPI/Swagger, Event-Driven Architecture, RabbitMQ, Apache Kafka

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: Docker, Kubernetes, Azure DevOps, CI/CD Pipelines, Git, GitHub, Maven, Postman

Testing & Quality: JUnit 5, Mockito, SonarQube, Unit Testing, Integration Testing, Code Review

Experience

Capgemini

Senior Software Engineer

Sep 2024 – Present

Bangalore, India

SME Risk Analytics & Monitoring Dashboard

- Designed and developed **10+** reactive microservices and RESTful APIs using **Java** and **Quarkus**, enabling real-time SME risk monitoring across a scalable, event-driven backend architecture.
- Built and secured **15+** REST API endpoints and integrated **IBM FileNet** for enterprise content and document management, improving document retrieval efficiency for compliance workflows.
- Delivered analytics capabilities across **2 production regions** (Hong Kong and Singapore) by integrating **MicroStrategy** with scalable backend microservices, supporting cross-region risk reporting.
- Authored **500+** comprehensive **JUnit 5** and **Mockito** test cases achieving **95%+** code coverage, and enforced code quality via **SonarQube**, reducing production defects by **35%**.

SME Mobile Application

- Building backend microservices and Experience APIs from the ground up using **Java 21** and **Spring Boot 4** for Standard Chartered's next-generation SME Mobile application within an **Agile (Scrum)** delivery model.
- Integrating **10+** S2B APIs through **Kong API Gateway** and Standard Chartered's Identity Provider (SC IDP), delivering secure, mobile-optimized REST APIs with OAuth2-based authentication.
- Improving API response times through **multithreading** and **Caffeine** in-memory caching, while deploying cloud-native services to **Kubernetes** via automated **Azure DevOps CI/CD pipelines**.

Projects

AI-Powered Fitness Platform | Java, Spring Boot, React.js, RabbitMQ, MySQL, Google Gemini API

- Built an AI-driven recommendation engine using the **Google Gemini API**, generating personalized fitness insights for **100+** users from real-time activity data.
- Implemented secure authentication and authorization using **Keycloak** with **OAuth2/OpenID Connect (OIDC)** across **5+** distributed microservices, eliminating unauthorized access incidents.
- Enabled asynchronous, event-driven communication using **RabbitMQ**, processing **100+** events/day and improving system reliability with **99.9%** message delivery success.
- Developed a responsive frontend using **React.js** and optimized data persistence across **PostgreSQL** and **MySQL**, reducing average query response time by **30%**.

Education

JIS College of Engineering

Bachelor of Technology (B.Tech) in Computer Science

July 2020 – June 2024

CGPA: 8.75

Coursework: Data Structures and Algorithms, DBMS, Design Patterns, Computer Networks, Operating System, Distributed Systems

Certifications & Achievements

Competitive Programming — **500+** problems solved across platforms; HackerRank Java **5-Star** Gold Badge.

2nd Place — **Capgemini Internal Hackathon** — Led a team of **7** to design and ship a full-stack banking application using Goose AI in **4 hours**, placing **2nd** out of **10** teams.

Certifications: Java Full Stack Developer (React) • Microsoft Azure Fundamentals (AZ-900) • Agile Software Development • Prompt Engineering for AI
